

HELSI

Pallet Box

Innovative Products with functional and modern design,
manufactured with the latest moulding technology from high quality materials

HELESI PALLET BOX

The HELESI pallet boxes comprise a unique carriage and storage system to serve a number of several industrial needs. The dimensions have been adapted to optimize transportation or storage space utility, in trucks, containers, warehouses or even production facilities. Pallet boxes are produced using non toxic materials while the round edges and smooth surface facilitate their cleaning.

The HELESI pallet boxes can be available in two types: open and close type. The closed type pallet box is suitable for liquids and is resistant to both diluted and concentrated acid and alkaline solutions, due to the high quality raw materials used for their production. The double walled structure, with corner and centre-sided columns and the conformation of the bottom, featuring reinforcement ribs, guarantee greater resistance to compression load. This makes the pallet boxes appropriate for heavy loads and storage of bulk and packaged products and liquids. The liquid drainage outlet, fitted in the inner surfaces of the pallet boxes, has 1" or 2" diameter, enabling the easy and hygienic cleaning of the box interior.

STANDARD COLOURS SPECIAL COLOURS

The open HELESI pallet boxes are especially suitable for refrigeration applications, thanks to their resistance to cold and carriage capacity. Manufactured using high quality, food-friendly polyethylene, guaranteeing long life expectancy and resistance against chemicals, frost, heat and UV radiation. Depending on special stacking needs, they can be provided with cross-beam or on base. Also, they are available with a front opening door or small tap enabling oversight and sample taking of the content. Customized names, logos, instructions, serial numbers and graphics can be embossed or hot stamped on the body of the box, making possible the individualisation of the boxes.

TYPE	DIMENSIONS	WEIGHT (Kg)	CAPACITY
GV-C 1076 (closed)	1200x1000x760 mm	A: 33,70 - B: 37,30 - C: 40,05	680 lt
