multi bin

HELESI

Innovative Products with functional and modern design,
manufactured with the latest molding technology from high quality materials

HELESI MULTI BIN

The multi bin comprises only two elements. Bin body and hood are produced separately in a modern injection moulding process, using modern tools and high quality HDPE granulate.

All metal parts used for fastening the multi bin to posts and walls are corrosion protected and produced with a view to high robustness and durability.

Simple to handle: the bin is simply hooked into a bracket using integrated hooks. Light pressure onto the rain hood makes the body of the bin arrest into the spring lock, fixing it securely. The body of the bin can be detached again for emptying using a triangular key.

The multi bin is an independent and innovative further development of the well-known DIN paper basket, optimised on the basis of specifications by HELESI SA. The multi-battery has a closed hood and additional small inserts for various battery types, as well as a special inner container for coin cells

The multi-bin is equipped with two metal ashtrays (optional extra on request). Placed in the upper corners under the rain hood, they are protected from rain and can be emptied easily

- 50L Volume
 - UV-stabilised, high quality HDPE, resistant against heat, frost and chemicals
 - Appealing modern design with practical functions
 - Lid featuring spring lock mechanism with triangular key for fast emptying and closing of the bin
 - Mounting parts for attaching the bin to posts or walls enclosed
 - Various equipment options for different applications
- very robust construction and form for high durability
